

WHAT IS THE BLACK HAWK COUNTY METROPOLITAN AREA TRANSPORTATION POLICY BOARD?

Federal law requires the formation of metropolitan planning organizations (MPO) for urbanized areas with a population greater than 50,000. The role of an MPO is to oversee transportation planning and programming to ensure that existing and future federal expenditures on transportation projects are based on a **continuing**, **cooperative**, and **comprehensive** (3-C) planning process.

The Black Hawk County MPO consists of the contiguous urbanized area at the center of Black Hawk County, Iowa. The corporate boundaries included in this area are the cities of Cedar Falls, Elk Run Heights, Evansdale, Hudson, Raymond, and Waterloo. The MPO has a defined urban area boundary and study area boundary. The **urban area boundary** is a smooth boundary that captures all census-defined urbanized area. This boundary also defines whether roadways are considered "urban" or "rural" for federal functional classification. The **MPO study area** boundary defines what area is expected to be urbanized over a horizon of 20 years. The MPO study area includes the city of Gilbertville and parts of unincorporated Black Hawk County.

2 TRANSPORTATION SERVICES

Metropolitan Transit Authority Waterloo Regional Airport

WHAT THE MPO DOES

Conduct transportation planning for the metro area in cooperation with state and federal government

Establish transportation goals and objectives for the metro area

Identify short- and long-range transportation needs

Conduct multimodal transportation planning (bicycle, pedestrian, transit, freight)

Analyze and evaluate transportation improvements

Estimate future traffic volumes

Inform the public about planning activities

Conduct planning studies

Allocate three federal funds passed through the lowa DOT

HOW ARE DECISIONS MADE?

The Iowa Northland Regional Council of Governments (INRCOG) is designated by the State of Iowa as the MPO for the Black Hawk County Metropolitan Area. Three designated committees form the structure of the MPO: The **Policy Board**, the **Transportation Technical Committee**, and the **Bicycle and Pedestrian Advisory Committee**. The Policy Board and Transportation Technical Committee meet jointly, monthly.

The **Policy Board** is the governing body of the MPO. Voting Policy Board members include the Mayor from Cedar Falls, Elk Run Heights, Evansdale, Gilbertville, Hudson, Raymond, and Waterloo, a member of the Black Hawk County Board of Supervisors, and representatives from the MET Transit Board and the Waterloo Regional Airport Board.

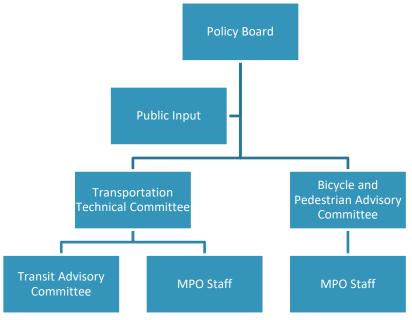

The **Transportation Technical Committee** serves as the primary advisory body to the Policy Board on technical matters pertaining to the development of MPO transportation planning documents and comprehensive long- and short-range transportation planning.

The **Bicycle and Pedestrian Advisory Committee (BPAC)** is directly responsible to the Policy Board to provide guidance and strategies on the planning and implementation of transportation projects related to bicycle and pedestrian travel. The BPAC meets annually to discuss, rank, and program transportation alternatives projects.

The MPO establishes and supports subcommittees and working groups as needed. A standing subcommittee of the Transportation Technical Committee is the Transit Advisory

Committee (TAC). This group meets at least twice applied to discuss passenger transportation and human

Committee (TAC). This group meets at least twice annually to discuss passenger transportation and human service agency coordination, and to help develop the Passenger Transportation Plan.

CALENDAR YEAR 2025 MEETING DATES

January 9	February 13	March 13
April 10 (Transportation Technical Committee Only)	May 8	June 12
July 10	August 14	September 11
October 9	November 13	December 11

WHAT ARE THE CORE REQUIREMENTS OF THE MPO?

Transportation Planning Work Program (TPWP)

Outlines the transportation planning activities MPO staff plan to conduct in the next state fiscal year and sources of funding; updated annually.

Transportation Improvement Program (TIP)

Includes all projects programmed for federal transportation funding in the MPO in the next four federal fiscal years; updated annually.

Long-Range Transportation Plan (LRTP)

Reviews the current condition and future needs of the multimodal transportation system and provides guidance for transportation investment decisions; must include a minimum 20-year planning horizon; updated every five years.

Passenger Transportation Plan (PTP)

Provides coordination between passenger transportation providers and human service agencies and recommends projects to improve passenger transportation; joint document with the Iowa Northland Regional Transportation Authority, a six-county region of Black Hawk, Bremer, Buchanan, Butler, Chickasaw, and Grundy Counties; full document every five years.

Public Participation Plan (PPP)

Details the processes the MPO will follow to involve the public in the transportation planning and programming process; updated every five years.

Programming of Federal Funds

The MPO administers three federal programs that are passed through the lowa DOT: The Surface Transportation Block Grant (STBG) Program, Transportation Alternatives Set-Aside (TASA), and the Carbon Reduction Program (CRP). STBG provides flexible funding that may be used on any Federal-aid highway, bridge projects on any public road, pedestrian and bicycle infrastructure, and transit capital projects. TASA funds are used to support on-and off-road pedestrian and bicycle facilities. The new Carbon Reduction Program funds projects designed to reduce transportation emissions from on-road highway sources. Example projects include bike lanes, EV charging infrastructure, and low-no emission buses, among others.

The MPO receives approximately \$338,000 in CRP funds, \$354,000 in TASA funds, and \$3.56 million in STBG funds annually to program towards transportation projects within the MPO. The process begins with the solicitation of projects at the beginning of the calendar year. STBG, TASA, and CRP projects are ranked and programmed using a project comparison process. All projects recommended for funding are incorporated into the draft TIP, distributed to the MPO Policy Board for review, and taken out for public comment.

Staff Liaison

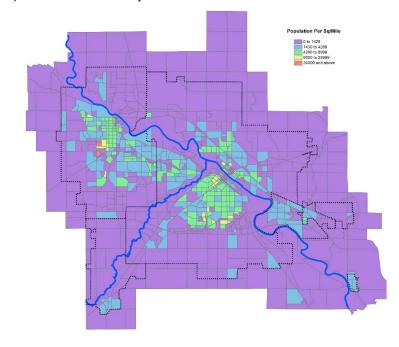

MPO staff conduct transportation planning for the metropolitan area in cooperation with state and federal government. Staff assists the MPO Policy Board by preparing documents, fostering interagency coordination, facilitating public input, and managing the planning process. MPO staff can also provide Policy Board and Technical Committee members with **information** and **technical assistance at any time**. The diverse skills of the staff ensure that your transportation projects and priorities are coordinated with land use, economic development, and regional and statewide plans for all modes of surface transportation.

Data Services

The MPO uses a full range of Geographic Information Systems (GIS), mapping, and graphic design tools for development of plans and grant applications. These services are also available externally to MPO members for the creation of specific maps to visualize a variety of data.

Safe Routes to School

The Safe Routes to School Coordinator works with schools in a six-county region – including the Black Hawk County metropolitan area – to promote and encourage students safely walking and bicycling to and from school. INRCOG has been involved with Safe Routes initiatives since 2014. To date, INRCOG staff have:

- Supported Safe Routes-related education, activities, and events in 33 elementary schools in 19 school districts.
- Organized and promoted 10 Walking School Bus routes, encouraging physical activity and safety for over 100 students.
- Hosted 60 Bike Rodeo safety education events, educating over 4,500 students in bike and pedestrian safety.
- Partnered with five cities for community walkability and bikeability studies.
- Organized trail rides for two elementary schools and one county conservation program.
- Facilitated in-class Helmets and Hand Signals lesson for second grade classrooms in elementary schools reaching over 200 students annually.
- Partnered with 23 community and youth organizations to educate students and families outside of school boundaries to increase more trips taken by foot, decrease environmental impacts, and increase healthy outcomes with increased physical activity.

Grant Writing

INRCOG staff can assist your community with the development of your project – from conceptualization to identifying funding opportunities and preparing grant applications. Our staff has extensive experience writing a variety of federal and state grants and is familiar with the complex state and federal regulations and guidelines associated with grant opportunities.

Transportation Grants

- Revitalize Iowa's Sound Economy (RISE)
- Iowa Clean Air Attainment Program (ICAAP)
- Railroad Revolving Loan and Grant Program (RRLG)

Recreation and Natural Resources Grants

- Resource Enhancement and Protection (REAP)
- Land and Water Conservation Fund (LWCF)
- State Recreational Trails (SRT)
- Federal Recreational Trails (FRT)
- Community Attraction and Tourism (CAT)
- Iowa Water Trails Enhancement

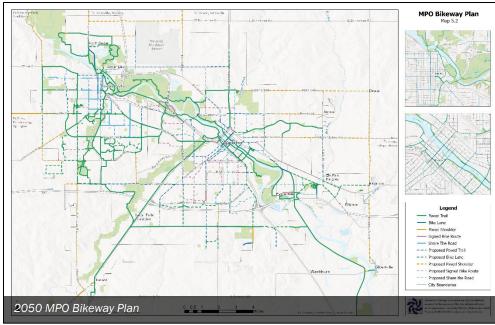

Bicycle Planning

INRCOG has been working on a variety of bicycle-related projects, including the City of Waterloo's first bike lanes. The Park Avenue bike lanes are protected by a striped buffer and, in some locations, by parked vehicles, also. The development of these protected bike lanes began in 2017. The term protected refers to any sort of vertical protection between a bike lane and driving lane, such as delineator posts, planters, or parked cars. Initially, only parked cars served as the vertical separation, however, the City installed delineators posts in 2018 to prevent through traffic from driving in the parking area.

Development of the Park Avenue bike lanes was spearheaded by the Waterloo Complete Streets Advisory Committee. MPO staff helped facilitate discussions between multiple City departments and elected officials, and staff also helped develop the initial planning-level design of the protected bike lane concept.

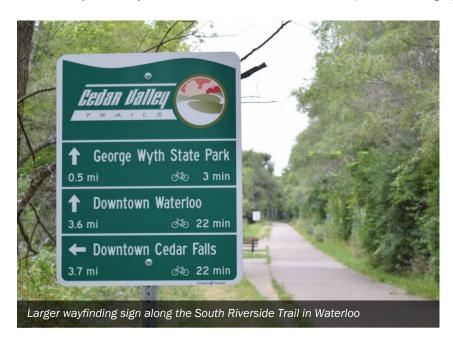

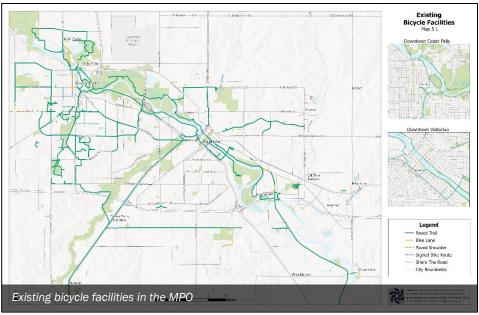

As part of the 2050 Long-Range Transportation Plan, INRCOG completed the 2050 MPO Bikeway Plan. This plan defines how each community can expand their on- and off-road bicycle facilities as part of an overall bicycle network. MPO staff carefully reviewed roadways in detail to determine feasible planned on-road facility types. Several factors were considered when making these determinations including each road's right-of-way, trees, driveways, drainage areas, traffic volumes, and lane configurations. Connectivity to businesses and educational instructions was also a priority. MPO staff also identified low-volume residential streets that can be used by bicyclists without any additional treatments while being suitable as part of a bicycle network.

Trail Network Wayfinding Signage

The Black Hawk County metropolitan area has upwards of 120 miles of continuous paved trails that connect six cities, one county, and one state park. Over the years, ongoing trail construction has created new loops and connections. This has resulted in an extensive but oftentimes confusing trails network that is hard to navigate. In 2016, INRCOG partnered with the Cedar Trails Partnership to secure a \$20,000 grant from Principal Financial Group to add wayfinding signage on the trails network. INRCOG used federal Metropolitan Planning funds to develop and implement the project – from concept to implementation – in under eight months.

INRCOG identified destinations, calculated route distances, and identified the placement of every customized sign. Most signs included three destinations, each with a directional arrow, distance in miles, and distance in minutes by bicycle. The layout is consistent among all signs, and this methodology can be applied to wayfinding projects in other communities. Careful consideration was given to ensure the wayfinding signs function in sequence, so trail users can follow the signs continuously until they reach their destination. INRCOG also produced the graphic design for the signage.

Signs are located at trail intersections, diversion points, and other locations throughout Waterloo, Cedar Falls, Evansdale, Hudson, George Wyth State Park, and the Cedar Valley Nature Trail. The grant funded a total of 175 larger wayfinding signs, 175 small wayfinding signs, and 130 maintenance signs. INRCOG also created marketing and public relation materials to spread awareness amongst the region, including flyers, presentations, and outreach to local media.

COMMITTEE REPRESENTATION

Policy Board Members – Calendar Year 2025

Representing	Name	Title	MPO Membership
City of Cedar Falls	Danny Laudick	Mayor	Member
	Gil Schultz	Councilperson	1 st Alternate
	Chris Latta	Councilperson, Mayor Pro Tem	2 nd Alternate
